JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Vol. 323 Nos. 1 and 2 24 JANUARY 1992

CONTENTS

Multidimensional integral equations. Part 1. A new approach to solving microelectrode diffusion problems
M.V. Mirkin and A.J. Bard (Austin, TX, USA) 1

Multidimensional integral equations: a new approach to solving microelectrode diffusion problems. Part 2. Applications to microband electrodes and the scanning electrochemical microscope
M.V. Mirkin and A.J. Bard (Austin, TX, USA) 29

Steady-state voltammetry at microelectrodes of arbitrary shape
K.B. Oldham (Peterborough, Canada) 53

Amperometric enzyme electrodes. Part 5. The homogeneous mediated mechanism
W.J. Albery (Oxford, UK), P.N. Bartlett (Coventry, UK), B.J. Driscoll and R.B. Lennox (London, UK) 77

Analysis of cyclic voltammetric responses by Fourier transform-based deconvolution and convolution procedures
M.I. Pilo, G. Sanna and R. Seeber (Sassari, Italy) 103

The kinetics of the reduction processes of PbO film in H_2SO_4. Part 3. Potential step method in Pb + Ca alloy electrodes
Y. Guo (Jinan, China) 117

Preparation and electrochemical characterization of O-transfer catalytic centers in thin films of mixed-valence ruthenium oxide cross-linked with cyanide
P.J. Kulesza and M. Bandoch (Warsaw, Poland) 131

The electro-oxidation of glucose on microcolumnar gold electrodes in different neutral solutions
A.M. Castro Luna, M.F.L. de Mele and A.J. Arvia (La Plata, Argentina) 149

Voltammetry of vanadyl sulfate hydrates in the absence of a deliberately added liquid phase
W. Gorski and J.A. Cox (Oxford, OH, USA) 163

Oxygen reduction on Au (100) and vicinal Au (910) and Au (11, 1, 1) faces in alkaline solution. A rotating disc–ring study
S. Štrbac, N.A. Anastasijević and R.R. Adžić (Belgrade, Yugoslavia) 179

Polyaniline-based membranes for gas electrodes
M. Fabrizio, F. Furlanetto, G. Mengoli, M.M. Musiani and F. Paolucci (Padova, Italy) 197

Cyclic voltammetric and potential-modulated reflectance spectroscopic study of the electroadsorption of methanol and ethanol on a platinum electrode in acid and alkaline media
J.A. Caram and C. Gutiérrez (Madrid, Spain) 213

Study of iron electrodissolution in carbonate / bicarbonate solutions by electrochemical impedance spectroscopy
E.B. Castro and J.R. Vilche (La Plata, Argentina) 231

Study of relaxation current oscillations observed during the transition from the active to the passive state of a cobalt electrode in phosphoric acid solutions
D. Sazou and M. Pagitsas (Thessaloniki, Greece) 247

Mixed-valence electron hopping, redox conduction and migration effects in solid-state electrochemistry of transition metal hexacyanoferrates
P.J. Kulesza (Urbana, IL, USA) and Z. Galus (Warsaw, Poland) 261

Cyclic voltammetry of $Na[PcCo(CN)_2]$. Analysis of adsorption phenomena during electro-oxidation
A. Leverenz, B. Speiser and M. Hanack (Tübingen, Germany) 275

EMIRS studies of formic acid electrooxidation on Pd, Au and Pd + Au alloys. Part 1. Investigation of the adsorbates derived from HCOOH and NaCOOH chemisorption at Pd in acid and alkaline solutions
M.E. Vela, R.O. Lezna, N.R. De Tacconi, A.J. Arvia (La Plata, Argentina), B. Beden, F. Hahn and C. Lamy (Poitiers, France) 289

Voltammetric study of the electrochemical behaviour of glycolic acid solutions in sulphuric acid on platinum single-crystal electrodes with basal orientations
J.M. Orts, J.M. Feliu and A. Aldaz (Alicante, Spain) 303

In situ FTIRS features during oxygen adsorption and carbon monoxide oxidation at a platinum electrode in dilute alkaline solutions
S.-G. Sun and A.-C. Chen (Fujian, China) 319

Radiotracer study of the electrosorption of a simple peptide molecule on gold and platinized platinum electrodes
G. Horányi, E.M. Rizmayer, E.P. Simon and J. Szammer (Budapest, Hungary) 329

Short communications

Radial diffusion in electrochemistry of two-dimensional systems at the air–water interface
D.H. Charych, C.A. Goss and M. Majda (Berkeley, CA, USA) 339

A simple expression for the redox titration curve
R. de Levie (Washington, DC, USA) 347

Preliminary notes

Quartz crystal microbalance study on the electrochemical dissolution of iron in organic media of different acidities. Application to the formation of polypyrrole films on iron electrodes
C.A. Ferreira, S. Aeiyach, P.C. Lacaze, P. Bernard and H. Takenouti (Paris, France) 357

Initial surface structure of flame-annealed Au(100) in aqueous solution. Consistency between in-situ scanning tunneling microscopy and electrochemical results
A. Hamelin (Meudon, France), X. Gao and M.J. Weaver (West Lafayette, IN, USA) 361

The reduction of Fe(methylphenanthroline)$_3^{3+}$ by cytochrome *c*
E. Magner (London, UK) 369

A generalised diffusion–migration equation for long distance electron hopping between redox centres
L.S. Mohan and M.V. Sangaranarayanan (Karaikudi, India) 375

Inhibition of the electroreduction of $Fe(CN)_6^{3-}$ at microelectrodes in the absence of supporting electrolyte. Mediation of the inhibited reduction by methyl viologen
C. Lee and F.C. Anson (Pasadena, CA, USA) 381
